# Updating the Water Testing Program

Our private testing of the water quality of Birch Lake involved samples from ten different locations around the lake last week. We are pleased to report that all but one location proved to be fine and well within the required standards for all water activities. The location of which we were not proud actually was listed as marginal. Another sample taken from this area will be studied this week. All results will be passed along to the Cass County Dept. of Health.

# Memories, Reflections, Thoughts

Several years ago, when time was available and some other things were too, the Yacht Club Building was upgraded, re-wired, painted, cleaned up and used on a regular basis. How sad for some of us who grew up on "Birch" and would have loved a place to have the dances we planned, the picnics, the just plain fun we looked for a place to have that we did not have the building for. Now it sits. Used for Bingo--with a turnout of 14--The Champagne Bridge cancelled, no Saturday night rap sessions, no from midnight until six o'clock happy laughing voices. Won't some— in the morning, is delightful, one care? Unless a little attention but 24 hours a day of the stuff, now starts the ball rolling, there seven days a week, is too much of won't be a place left when our children are old enough. Those qualities of life which seem missing in today's society may be just what the doctor ordered for our coming generation. A little time here, a little love there, when all the pieces fall into place, the puzzle makes a complete picture. Are you a piece of that puzzle? Can you give that extra piece of time or energy, or counsel or whatever? Let your kids plan a party and use the Clubhouse. Maybe someone else will, too.
